

LIAIGRE

Care and Maintenance

Ash Wood

Cleaning Product(s):

Microfiber

Instructions:

For genral cleaning and maintenance, remove dust with a dry, clean microfiber

Notes:

As with all wooden furniture, wet objects (ice bucket, vase, wet glasses...) should not be placed directly on table tops. Any liquids and especially alcohols spilled on the surface should be wiped off immediately. Since wood is a living material, significant hygrometric changes and prolonged exposure to sunlight or moonlight can alter the original structure and initial hues.
