

LIAIGRE

Care and Maintenance

Wood - High Gloss

Cleaning Product(s):

Clean, white, lintless cotton cloth or soft sponge

Glass cleaner (windex)

Instructions:

Use a clean damp, soft sponge or clean cotton cloth sprayed with glass cleaner (windex) to remove dust and dirt from surface. Do not use an abrasive sponge as it may scratch the furniture or any harsh solvents that may damage the finish.

Notes:

Do not use wax, wood polish, oils or over the counter cleaning products. As with all wooden furniture, wet objects (ice bucket, vase, wet glasses...) should not be placed directly on table tops. Any liquids and especially alcohols spilled on the surface should be wiped off immediately. Since wood is a living material, significant hygrometric changes and prolonged exposure to sunlight or moonlight can alter the original structure and initial hues.
