

LIAIGRE

Care and Maintenance

Wood - Natural

Cleaning Product(s):

Soft brush or feather duster

Instructions:

With soft brush or feather duster, carefully remove dust by brushing along the grain.

Notes:

Never use a cloth or microfiber as the wood can splinter. As with all wooden furniture, wet objects (ice bucket, vase, wet glasses...) should not be placed directly on table tops. Any liquids and especially alcohols spilled on the surface should be wiped off immediately. Since wood is a living material, significant hygrometric changes and prolonged exposure to sunlight or moonlight can alter the original structure and initial hues.

Yearly Maintenance:

In case of staining on wood, lightly sand surface with 320 grit sandpaper.
