

LIAIGRE

Care and Maintenance

Wood - Open Grain

Cleaning Product(s):

Clean, white, lintless cotton cloth

Instructions:

For general cleaning and maintenance, wipe wood surface using a clean dry, lint free cotton cloth moving in the direction of the grain.

Notes:

As with all wooden furniture, wet objects (ice bucket, vase, wet glasses...) should not be placed directly on table tops. Any liquids and especially alcohols spilled on the surface should be wiped off immediately. Since wood is a living material, significant hygrometric changes and prolonged exposure to sunlight or moonlight can alter the original structure and initial hues.
