

LIAIGRE

Care and Maintenance

Metal - Polished Bronze

Cleaning Product(s):

Microfiber

Wright's copper cream

Nitrile gloves

Container of lukewarm water

Instructions:

Use a black microfiber for general cleaning and dusting. For maintenance: Wright's Copper Cream, Nitrile gloves, 2 Microfiber cloths (tags removed), small container of lukewarm water.

Notes:

For bronze furniture and lighting, the color treatments used by LIAIGRE are made by master bronzesmiths who recommend avoiding the use of chemical cleaning products as well as acidic products (vinegar, champagne, white wine, lemon) that could damage the finish. The polished bronze finish can oxidize and therefore requires special attention. Wear gloves when handling polished bronze as the oil on your hands can tarnish the finish.

Yearly Maintenance:

1. Carefully prepare surface by gently wiping with a clean microfiber. Ensure edges/tag from towel are not present as they can mark/scratch the surface. 2. Wearing Nitrile gloves, apply a light amount of polish in one foot sections using the applicator included. 3. Dampen a section of clean microfiber towel with warm water. 4. Gently wipe away applied/dried polish. 5. Buff the surface with dry clean microfiber towel.
