

LIAIGRE

Care and Maintenance

Wood - Satin Finish

Cleaning Product(s):

Chamois cloth

Instructions:

Dampen a clean chamois cloth. Ring out excess water and wipe surface to remove dust and dirt.

Notes:

As with all wooden furniture, wet objects (ice bucket, vase, wet glasses...) should not be placed directly on table tops. Any liquids and especially alcohols spilled on the surface should be wiped off immediately. Since wood is a living material, significant hygrometric changes and prolonged exposure to sunlight or moonlight can alter the original structure and initial hues.
